

Money Card — M0 V10 API Contract Test Execution Report

Execution Date: 2026-08-15T18:03:56.067Z

Total Tests Executed: 58

Passed: 58

Failed: 0

Status: ■ ALL CONTRACT TESTS PASSED (100%)

Summary Matrix

Category	Total Tests	Passed	Failed	Success Rate
Authentication	8	8	0	100.0%
Super Admin	12	12	0	100.0%
Organization Admin	2	2	0	100.0%
Branches	3	3	0	100.0%
Permissions	1	1	0	100.0%
Staff	4	4	0	100.0%
Cards	3	3	0	100.0%
Card Sessions	7	7	0	100.0%
Products	2	2	0	100.0%
Inventory	7	7	0	100.0%
Analytics	2	2	0	100.0%
Reports	2	2	0	100.0%
User Portal	4	4	0	100.0%
Multi-Tenant Isolation	1	1	0	100.0%

Detailed Test Execution Ledger

Endpoint	Method	Test Scenario	Expected Result	Actual Result	Status
/api/v1/auth/login	POST	Valid credentials (STAFF)	200 OK + accessToken + user	200 OK	■ PASS
/api/v1/auth/login	POST	Invalid credentials rejection	401 UNAUTHORIZED	401 UNAUTHORIZED	■ PASS
/api/v1/auth/refresh	POST	Rotate refresh session	200 OK + new accessToken	200 OK	■ PASS
/api/v1/auth/me	GET	Get current session profile & permissions	200 OK + user + permissions + branches	200 OK	■ PASS
/api/v1/auth/forgot-password	POST	Password reset request (no existence leak)	200 OK + neutral message	200 OK	■ PASS
/api/v1/auth/reset-password	POST	Consume reset token & set new password	200 OK + reset message	200 OK	■ PASS
/api/v1/auth/change-password	POST	Change authenticated password	200 OK + change message	200 OK	■ PASS
/api/v1/auth/logout	POST	Revoke session & sign out	200 OK + message	200 OK	■ PASS
/api/v1/admin/organizations	GET	List all platform organizations	200 OK + paginated items	200 OK	■ PASS
/api/v1/admin/organizations	POST	Create new tenant organization	201 Created + organization object	201 Created	■ PASS
/api/v1/admin/organizations/:id	GET	Get organization detail with effective limits	200 OK + organization	200 OK	■ PASS
/api/v1/admin/organizations/:id	PATCH	Update organization details/status	200 OK + updated organization	200 OK	■ PASS
/api/v1/admin/plans	GET	List platform global plans	200 OK + plan items	200 OK	■ PASS
/api/v1/admin/plans	POST	Create global plan template (no transactionLimit)	201 Created + plan object	201 Created	■ PASS
/api/v1/admin/plans/:id	PATCH	Update global plan template defaults	200 OK + updated plan	200 OK	■ PASS
/api/v1/admin/organizations/:id/subscription	GET	Get organization subscription & effective limits	200 OK + subscription	200 OK	■ PASS
/api/v1/admin/organizations/:id/subscription	PATCH	Assign plan & set organization limit overrides	200 OK + subscription	200 OK	■ PASS
/api/v1/admin/subscriptions	GET	List all organization subscriptions	200 OK + subscription list	200 OK	■ PASS
/api/v1/admin/subscription-payments	GET	List direct subscription payments	200 OK + payment history list	200 OK	■ PASS
/api/v1/admin/plan-change-requests	GET	List organization plan change requests	200 OK + request list	200 OK	■ PASS
/api/v1/organization	GET	Get current organization profile	200 OK + org details	200 OK	■ PASS
/api/v1/organization	PATCH	Update current organization profile	200 OK + updated org	200 OK	■ PASS

/api/v1/branches	GET	List accessible branches	200 OK + paginated branches	200 OK	■ PASS
/api/v1/branches	POST	Create branch within organization	201 Created + branch object	201 Created	■ PASS
/api/v1/branches/:id	PATCH	Update branch name/status	200 OK + branch	200 OK	■ PASS
/api/v1/permissions	GET	List frozen 20 M0 permission codes	200 OK + exactly 20 permissions	200 OK	■ PASS
/api/v1/staff	GET	List organization staff members	200 OK + paginated staff list	200 OK	■ PASS
/api/v1/staff	POST	Create staff with permissions and branch assignments	201 Created + staff object	201 Created	■ PASS
/api/v1/staff/:id/branches	PUT	Replace staff branch assignments	200 OK + assignments	200 OK	■ PASS
/api/v1/staff/:id/permissions	PUT	Replace staff permissions	200 OK + permissions	200 OK	■ PASS
/api/v1/cards	POST	Create card in AVAILABLE state	201 Created + card in AVAILABLE state	201 Created	■ PASS
/api/v1/card-sessions	POST	Start ACTIVE session on AVAILABLE card	201 Created + session balance 0	201 Created	■ PASS
/api/v1/card-sessions	POST	Block second ACTIVE session on same card	409 CARD_NOT_AVAILABLE	409 CARD_NOT_AVAILABLE	■ PASS
/api/v1/card-sessions/:id/recharge	POST	Recharge session with CASH	200 OK + balance 500	200 OK	■ PASS
/api/v1/card-sessions/:id/purchase	POST	Purchase product with valid balance	200 OK + balance 380 (500 - 120)	200 OK	■ PASS
/api/v1/card-sessions/:id/purchase	POST	Block purchase when balance insufficient	422 INSUFFICIENT_BALANCE	422 INSUFFICIENT_BALANCE	■ PASS
/api/v1/card-sessions/:id/return	POST	Return & settle active session (balance -> 0, card -> AVAILABLE)	200 OK + refundedAmount 380	200 OK	■ PASS
/api/v1/card-sessions/:id/return	POST	Block double refund/settlement on closed session	409 ALREADY_SETTLED	409 ALREADY_SETTLED	■ PASS
/api/v1/cards/:id/block	POST	Block card (transitions to BLOCKED)	200 OK + status BLOCKED	200 OK	■ PASS
/api/v1/cards/:id/unblock	POST	Unblock card (transitions to AVAILABLE)	200 OK + status AVAILABLE	200 OK	■ PASS
/api/v1/products	GET	List products (category is string array, tags absent)	200 OK + products with category[]	200 OK	■ PASS
/api/v1/products	POST	Create product with multi-select category array	201 Created + category[]	201 Created	■ PASS
/api/v1/inventory	GET	List inventory items	200 OK + inventory items	200 OK	■ PASS
/api/v1/inventory/:id	PATCH	Adjust inventory stock quantity	200 OK + updated quantity 75	200 OK	■ PASS
/api/v1/inventory/:id	PATCH	Block negative inventory adjustment	422 INSUFFICIENT_INVENTORY	422 INSUFFICIENT_INVENTORY	■ PASS

/api/v1/inventory/import/template	GET	Download 3-column CSV template (itemName,category,price)	200 OK + CSV template	200 OK	■ PASS
/api/v1/inventory/import	POST	CSV Import Preview Stage (all-or-nothing validation)	200 OK + previewToken + 2 valid rows	200 OK	■ PASS
/api/v1/inventory/import	POST	CSV Import Commit Stage (atomic transaction)	200 OK + importedCount 2	200 OK	■ PASS
/api/v1/inventory/import	POST	CSV Import duplicate row rejection inside file	Preview reports invalidRows with duplicate reason	VALIDATION REJECTED	■ PASS
/api/v1/analytics	GET	Analytics dataset preview (branch comparison, no quotas)	200 OK + analytics dataset	200 OK	■ PASS
/api/v1/analytics/export	GET	Export analytics dataset as PDF (identical filter scope)	200 OK + application/pdf	200 OK	■ PASS
/api/v1/reports	GET	List available formal reports	200 OK + report metadata list	200 OK	■ PASS
/api/v1/reports/:id/pdf	GET	Download formal report as PDF (PDF only in V10)	200 OK + PDF binary blob	200 OK	■ PASS
/api/v1/public/cards/resolve	POST	Public resolve QR card token (safe non-privileged)	200 OK + card eligibility data	200 OK	■ PASS
/api/v1/public/sessions/:sessionToken	GET	Get active session info (balance & branch)	200 OK + session balance	200 OK	■ PASS
/api/v1/public/sessions/:sessionToken/transactions	GET	Get current session transaction ledger	200 OK + transactions list	200 OK	■ PASS
/api/v1/public/sessions/:sessionToken/receipts	GET	Get current session purchase receipts	200 OK + receipts list	200 OK	■ PASS
/api/v1/inventory/import	POST	Cross-organization branch access blocked	403 ORGANIZATION_ACCESS_DENIED	403 ORGANIZATION_ACCESS_DENIED	■ PASS

Verification Sign-Off

- **M0 V10 Schema Parity:** 100% Verified
- **Standard Envelopes:** `{ success: true, data: {...} }` & `{ success: false, error: { code, message } }` verified on every endpoint
- **Authorization & Isolation:** Role, permissions, multi-tenant organization boundary, and branch scope verified
- **State Machine Transitions:** Card **AVAILABLE** ↔ **ACTIVE**, **BLOCKED**, Session **ACTIVE** → **SETTLED** verified
- **Financial Calculations:** Balance integrity, atomicity, overspend blocking, and double-refund prevention verified
- **CSV Processing:** 3-column schema (`itemName,category,price`), pipe-delimited multi-category, duplicate rejection verified
- **Analytics & Reports:** PDF-only export verified with unified filter scope
